

FINAL PROJECT REPORT

Due date: *To be announced*

Total points: 100 points

This is a teamwork assignment

Requirement

The project report will consist of two parts: group work and individual reflections.

General part: Student name + student ID

Part 1: The group-work part describes all the details of your project execution, including:

- Project name
- Project motivations: what are the issues in your product of interest? Or what are the existing problems but you found no existing solutions for them?
- Design process:
 - o Describe the solution alternatives that have been considered
 - o Mention in details the rationales for the chosen design approach
 - o Provide illustrations and description of lo-fi and hi-fi prototypes
- Evaluation: clearly describe how you evaluated your design and why you chose such evaluation approaches, including:
 - o Evaluation methods
 - o Detailed information about users/participants
 - o Procedure of evaluations: what are the tasks the participants had to perform? How did you gather information about your performance and feedback? How long did each evaluation session last? What are the questions (if using questionnaires) the participants had to answer?
 - o What are the results you collected from participants in the user study?
 - o What are the insights/findings you learned about the good and the bad of your design based on the data collected from the user study.

This part can be written by the entire group.

Part 2: In the individual part, you should provide your own personal reflections on the project. Here are some exemplary details that you may consider to mention in this part, but you are not necessarily limited within these points:

- What are other HCI problems in the product you were interested in?
- What other design choices have you considered by yourself? How different they are compared to the group's choices?
- How would you do differently in the design and prototypes?
- What do you think about the user evaluation? If you can do differently, what would it be?

Please not only provide detailed descriptions in texts but also consider using images and figures for illustrations. Also, do not forget to provide detailed captions and explanations for any figures you use.

This part **MUST** be written individually.

Any plagiarism, either between groups or between individuals, will receive a penalty of being failed in this course.

Submission

Directory structure:

- GroupWork.pdf: group work report written by your group.
- Individual reports:
 - o [StudentID1].pdf: individual reflection of Student 1
 - o [StudentID2].pdf: individual reflection of Student 2
 - o [StudentID3].pdf: individual reflection of Student 3
 - o [StudentID4].pdf: individual reflection of Student 4
 - o [StudentID5].pdf: individual reflection of Student 5
 - o Etc.

You must copy all documents to the directory named FinalReport - Group[GroupId] and compressed the whole directory to zip/rar file.

For example: FinalReport-Group01.zip
